PTOL-37 (Rev. 08-06)

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in telephone interviews with Frank Piskolich, Reg. No. 52,123, on March 21, 23, and 27, 2007.

2. The application has been amended as follows:

In the specification, page 1, before "FIELD OF THE INVENTION," insert a new paragraph:

--This is a continuation-in-part of U.S. patent application no. 10/115,446, filed April 2, 2002, now abandoned, which is a continuation of U.S. patent application no. 09/162,036, filed September 28, 1998, now U.S. patent no. 6,368,326. --.

In claim 1, line 9, after "it," insert -- , the at least one fastener including a lock for locking the cord to the fastener through which it passes, wherein the opening comprises a bore at least partially threaded and within which the cord extends, and wherein the lock comprises a threaded member threadingly received in the bore and capable of engaging the cord to restrain cord movement--.

Application/Control Number: 10/629,007

Art Unit: 3731

In claim 8, line 2, delete "pharmaceutical" and in its place, insert –

pharmaceuticals--.

In claim 11, line 1, delete "10" and in its place, insert -1--.

Cancel claim 10.

3. The following changes to the drawings have been approved by the examiner and

agreed upon by applicant: In figure 15B, the term "Fig." should be removed from the

middle of the drawing. In order to avoid abandonment of the application, applicant must

make these above agreed upon drawing changes.

4. The following is an examiner's statement of reasons for allowance. With respect

to claims 1-6, 8, 11-22, 24, 26, 28-30, 32-39, and 41-54: None of the prior art of record,

alone or in combination, discloses an orthopedic or bone fracture reduction system and

a method with the system including, inter alia, a length of flexible, inelastic cord, first

and second fasteners, and an axially rigid tubular support; where one of the fasteners

includes a threaded bore and a lock that is a threaded member, and where the method

includes the tubular support contacting and extending between first and second bone

segments after the tubular support has been advanced over the cord, which has been

attached to a first bone fragment via an internal fastener, and where the method further

includes drawing the cord through a bore in a second bone fragment to draw the

fragments together.

Page 3

Page 4

Art Unit: 3731

With respect to claims 55-60: None of the prior art of record, alone or in combination, a method for reducing a bone fracture, where the method includes, inter alia, attaching a flexible cord from within the bone interior to a first bone fragment, attaching an internal pulley bearing the cord to a second bone fragment, passing an end of the cord through an opening in a third bone fragment, and advancing first and second axially rigid tubular supports over the cord or advancing an axially rigid tubular support over the cord and tensioning the passed through the third bone fragment. Also, none of the prior art of record discloses a bone fracture reduction system including, inter alia, an internal fastener, a pair of flexible inelastic cords attached to the internal fastener, a pair of axially rigid tubular supports, and a pair of external fasteners.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Treace (3,953,896) and Overaker et al. (2003/0187444) teach fixation systems.
- 6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Julian W. Woo whose telephone number is 571-272-4707. The examiner can normally be reached on M-TH:6:30-4:00; alt. Fri.: 6:30-3:00.

Art Unit: 3731

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
